Immunology and Cell Biology (1995) **73**, 593–595

Subject Index

abstracts
19th Annual Conference of the Connective Tissue Society Australia and New Zealand A13
Annual Conference of the Australia and New Zealand Society for Cell Biology, Inc A1
airway dendritic cells; biology of 405
allergens; T cell response to 17
allergy; autoantibodies to IgE and (Review Article) 109
Antarctica; CMI in wintering personnel 316
antibody and protection against *H. influenzae* 258
antigen expression; effect of IL-4 on 165
apoptosis in B lymphocytes (Review Article) 8
Australia; mucosal solutions in (Overview) 387
autoimmune diseases; TCR repertoire expression in 297

B cell activation
effect of phorbal ester in CLL for 44
IFN-γ downregulation of 52
role of surface immunoglobulin and (Theoretical Article) 266
B cell epitope of HCV core protein 346
B cell; interferon-γ down-regulation of the proliferative response of 52
B cells
cell surface specific determinants on typhoid-specific 198
immunoglobulin suppression of colony formation of 158
tissue distribution after oral typhoid vaccination of antigen-specific 62
transgenic mice and (Theoretical Article) 169
B lymphocytes; WEHI-231 perspective of apoptosis in (Review Article) 8
bactericidal proteins from porcine polymorphonuclear neutrophils 38
basement membrane; degradation of 113
bone marrow
cells, effect of cisplatin on the proliferation and differentiation of 220
function of non-specific suppressor cells in 333
book reviews 98, 185, 272, 383
bronchitis, acute on chronic; model of mucosal immunology 414
Burkitt's lymphoma cells; cycloheximide-induced apoptosis in, with and without Epstein–Barr virus infection 463

C3b receptor; *Hind* III genomic polymorphism of 457
Candida albicans; humoral immune responses to 125
CD55 and CD59 deficient PNH-like cells 66
CD59 and CD55 deficient PNH-like cells 66
$CD8^+$ cells; spontaneous generation of 33
cDNA cloning; porcine granulocyte-macrophage colony-stimulating factor (Brief Comm.) 474
cell mediated immunity
in Antarctic wintering personnel 316
Pseudomonas aeruginosa 418
cellular immunity; effect of visible light on 239
chronic lymphocytic leukaemia; phorbol ester activation of $CD5^+$ B cells in 44
coeliac disease; pathogenesis of 433
colonic carcinoma
cells, infection with HIV 140
effect of TGF-β on 249
cross-reactive antibodies; use in immunohistological studies in Australian marsupials 321
cycloheximide-induced apoptosis in Burkitt's lymphoma cells 463
cytokine induced IgA secretion in SCID mice; homing to intestinal lamina propria and 425
cytokine therapy in mucosal immunity 389
cytokines
hapten-specific B cells stimulated by antigens and 52
role in immune system and integrated homeostasis (Theoretical Article) 377
therapeutic potential for multiple myeloma 326
tuberculin skin test biopsies and expression of mRNA of 362
cytotoxic drugs; therapeutic potential for multiple myeloma 326
cytotoxicity; IL-8 enhancement of 234

Darwin and homochauvinism in immunology (Commentary) 103
Darwinism in the development of science (Burnet Oration) 1
delayed-type hypersensitivity; role of cytokine mRNA expression in 362
dendritic cells, biology of airway cells 405
DNA; co-operative effect between IGF-1 and IL-2 on synthesis 341

effector cell populations; therapeutic potential for multiple myeloma 326
endothelial cells and degradation of subendothelial basement membrane 113
epithelial cells, small intestine; pathogenesis of coeliac disease 433
epithelium; biology of airway dendritic cells 405

feedback suppression of B cell colony formation 158
fetal immune system; deficiency in T cell response in lymphoid organs of 353

genetic feedback; memory lymphocyte-specific soma-to-germline (Theoretical Article) 174
granulocyte-macrophage colony-stimulating factor; cDNA cloning of porcine (Brief Comm.) 474
grass pollen allergens; relationship between skin tests and serum IgE levels in response to 17

Haemophilus influenzae; role of specific antibody in protection against 258
heat shock proteins in *L. major* 73
heparan sulphate proteoglycans; regulation of MCMV infection by 308
hepatitis C virus; murine immune response to core protein of 346
Hind III genomic polymorphism of the C3b receptor in systemic lupus erythematosus 457
histopathology, lung; following intratracheal challenge with live *Pseudomonas aeruginosa* in intestinally immunized rats 440
HIV *see* human immunodeficiency virus
homeostasis, integrated; role of immune system (Theoretical Article) 377
human immunodeficiency virus
infection of human umbilical vein carcinoma cells with 140
level of γδ lymphocyte activity with infection of 245

IgE and T cell response to grass pollen allergens 17
IGF-1 *see* insulin-like growth factor-1
immune system; role in integrated homeostasis (Theoretical Article) 377
immunity
  acute on chronic bronchitis 414
  mucosal, cytokine mediated effects in 389
  mucosal solutions in (Overview) 387
  Pseudomonas aeruginosa 418
immunization, intestinal; against H. influenzae 258
immunoglobulin E
  binding to peritoneal mast cells of 212
  parasite infections and autoantibodies to (Review Article) 109
immunoglobulin G and immunity to *C. albicans* 125
immunoglobulins
  role in feedback suppression of B cell colony formation 158
  role in human mucosal immunity 397
immunohistology using species cross-reactive antibodies in Australian marsupials 321
immunology
  homochauvinism in (Commentary) 103
  politics and personalities in (Burnet Oration) 1
infection; modifiers of the human mucosal immune system 397
insulin; regulate release of IL-1-α and IFN-γ 452
insulin-like growth factor-1; co-operative effect with IL-2 on DNA synthesis 341
interferon-γ
  downregulation of proliferative response of hapten-specific B cells by 52
  in ovine immune responses 146
interleukin-2
  co-operative effect with IGF-1 on DNA synthesis 341
  receptor, influence of compounds affecting release of 81
interleukin-4
  effect on antigen expression 165
  inhibition of other cytokines by 57
interleukin-8; enhances antibody-dependent cellular cytotoxicity 234
intestinal intraepithelial lymphocytes; extrathymic and thymic origin of (Theoretical Article) 469

Leishmania donovani; lack of serological specificity of recombinant heat shock protein of 446
Leishmania major; heat shock proteins and infection of human and murine macrophages with 73
leucocytes and degradation of subendothelial basement membrane 113
leukaemia; differentiation and genetic events in (Review Article) 193
linkage disequilibrium between alleles of TCR and susceptibility to rheumatic fever 369
lung diseases; immune recognition of stress proteins in chronic interstitial 23
lung, histopathology; following intratracheal challenge with live *Pseudomonas aeruginosa* in intestinally immunized rats 440
Ly-6 molecules; tissue expression, structure and function of (Review Article) 277
lymphopoiesis; effect of cell surface glycoproteins (Review Article) 277

marsupials, Australian; cross-reactive antibodies in immunohistological staining of lumphocytes in 321
mast cells
  removal and binding of IgE to 212
  UVB irradiation of skin induces degranulation of 226
MCMV *see* murine cytomegalovirus
MHC proteins; regulation of MCMV infection by 308
MHC
  diversity in T cell selection in the thymus (Commentary) 191
  peptide binding and (Theoretical Article) 95
monoclonal antibodies
  role of interferon-γ in ovine immune responses 146
  subunit of phospatidylinositol-3-kinase 134
mucosal immunity
  after oral typhoid vaccination 198
  cytokine mediated effects in 389
  in Australia (Overview) 387
  modifiers of 397
mucosal immunology; pathogenesis of coeliac disease 433
multiple myeloma; therapeutic potential of cytokines, cytotoxic drugs and effector cell populations for 326
5T33 murine myeloma model; assessment of combined immunotherapy/chemotherapy *vs* chemotherapy 326
murine cytomegalovirus; MHC proteins and heparan suphate proteoglycans regulation of infection with 308
Mycobacterium bovis; cytokine mRNA and delayed-type hypersensitivity to 362
Mycobacterium habana; development of vaccine using 372

natural suppressor cells; production of soluble suppressor factor by 333

oncogenesis in leukaemia (Review Article) 193
ovine immunity; role of interferon-γ in 146
oxidative stress; associated with infection with *L. major* 73

parasites and IgE mediated events (Review Article) 109
paroxysma; nocturnal haemoglobinuria and protease modified erythrocytes 66
peptide, MHC bound; T cell receptor Vα bias and 89
peritoneal cavity; cytokine induced IgA secretion and homing to intestinal lamina propria in SCID mice 425
phosphatidylinositol-3-kinase; production of monoclonal antibody to 134
platelets and degradation of subendothelial basement membrane 113
PNH *see* paroxysmal nocturnal haemoglobinuria
politics and personalities in the development of science (Burnet Oration) 1
polymorphonuclear neutrophils; antibacterial proteins from porcine 38
prolactin; regulate release of IL-1-α and IFN-γ 452
protease; modified erythrocyte 66
Pseudomonas aeruginosa
  histopathology of the lung following intratracheal challenge with 440
  pulmonary immunity to 418

recombinant heat shock protein, *Leishmania donovani*; lack of serological specificity of 446
rheumatic fever; linkage disequilibrium between alleles of TCR and susceptibility to 369

saliva; measure of human mucosal immunity 397
Salmonella typhimurium; release of IL-1-α and IFN-γ from murine splenocytes activated with porins or LPS of 452
sarcoidosis; immune recognition of stress proteins in 23

severe combined immunodeficiency mice; cytokine induced IgA secretion and homing to intestinal lamina propria in 425
skin tests and relationship to serum IgE level in response to grass pollen allergens 17
space flight; CMI in Antarctic wintering personnel as analogue for 316
stress proteins
chronic lung diseases and immune recognition of 23
mycobacterial vaccine using *Mycobacterium habana* 372
surface immunoglobulin in regulating T-independent antibody responses (Theoretical Article) 260
SV40-adenovirus; immortalized cell lines derived from 205
systemic lupus erythematosus; *Hind* III genomic polymorphism of the C3b receptor in 457

T cell receptors
αβ + cells, spontaneous generation of 33
γδ lymphocytes; HIV infection and activation of 245
repertoires are indistinguishable in 153
rheumatic fever susceptibility and linkage disequilibrium between alleles of 369
usage in autoimmune diseases 297
Vα bias determined by TCR-contact residues 89
T cell activation
role of Ly-6 mediated (Review Article) 277
deficiency in human fetal LN cells 353
T cells
response to grass pollen allergens 17
selection in the thymus (Commentary) 191
transgenic mice and (Theoretical Article) 169
thymocytes; TCR expression in double negative 33
thymus; intestinal intraepithelial lymphocytes in euthymic mice (Theoretical) 469
transforming growth factor-β; effect of, on colon carcinoma 249
transgenes; the trouble with (Theoretical Article) 169
tumour cells; effect of TGF-β on 249
tumour necrosis factor
-α, UVB irradiation of skin induces 226
interleukin-4 inhibition of expression of 57
typhoid vaccination
antigen-specific B cells after oral 62
mucosal immunity after oral 198

vaccination
antigen-specific B cells after oral typhoid 62
mucosal immunity after oral typhoid 198
using *Mycobacterium habana* protein for TB 372
vaccinia virus; recombinant expression of (Brief Comm.) 181
vincristine; effects of, on expression and release of IL-2 receptor 81
visible light; effects on cellular and immune parameters of 239

WEHI-231; perspective in B lymphocytes (Review Article) 8
